=====

DEVOPS & SYSTEMS ENGINEER

Computer Science graduate with hands-on experience in cloud deployment, containerization, backend systems, and structured data applications. Focused on DevOps, infrastructure reliability, Linux systems, and practical engineering workflows. Experienced with AWS EC2, Docker, FastAPI, SQL, REST APIs, and troubleshooting deployment environments.

=====

TECHNICAL SKILLS

Cloud & Infrastructure

- AWS EC2
- Linux (Ubuntu)
- Docker
- Docker Compose
- Git
- Bash (basic)

Programming

- Python
- Java
- JavaScript
- C/C++

Backend & Web

- FastAPI
- Node.js
- Express.js
- REST APIs
- React

Databases & Data

- PostgreSQL
- MySQL
- MongoDB
- SQL
- Pandas
- NumPy

Systems & Networking

- TCP/IP
- OSI Model
- System Troubleshooting
- Deployment Debugging

Identity & IT Systems

- Active Directory (basic)
- Microsoft 365
- Entra ID / Azure AD Fundamentals

=====

PROJECTS

PhotoBooth AI App (Docker + AWS EC2 Deployment)

GitHub:

<https://github.com/Luke-356/PhotoBooth>

- Built and deployed a containerized FastAPI application on AWS EC2
- Managed Docker-based deployment and application configuration
- Implemented image processing workflows using Python and OpenCV
- Configured networking and public application access
- Troubleshot deployment, performance, and request timeout issues
- Worked with Linux environments and backend system operations

Student Performance Prediction (Machine Learning)

GitHub:

<https://github.com/Luke-356/Student-Performance-Prediction-using-Machine-Learning>

- Built machine learning models using structured datasets
- Performed data cleaning, preprocessing, and feature engineering
- Conducted exploratory data analysis using Pandas and visualization tools
- Trained Random Forest, Linear Regression, and Gradient Boosting models
- Analyzed feature importance and model performance metrics
- Worked extensively with structured data and analytical workflows

AZManage

GitHub:

<https://github.com/Luke-356/AZManage>

- Developed a management system focused on structured user-related workflows
- Built backend logic and handled application data flow
- Worked with database-driven application architecture
- Applied concepts related to data consistency and system organization
- Developed frontend and backend application components

=====

PROFESSIONAL EXPERIENCE

Java Developer

Myanmar Information Technology (MIT), Yangon, Myanmar

Dec 2022 – May 2023

- Developed backend services using Java and SQL

- Worked with relational databases and structured data systems
- Optimized SQL queries and improved application behavior
- Assisted in debugging and resolving backend-related issues
- Collaborated with technical teams on internal business systems

Full-Stack Web Developer
TMS Legal, Yangon, Myanmar
Jun 2021 – Jun 2022

- Built and maintained database-driven web applications
- Developed REST APIs and backend logic
- Assisted with debugging, testing, and performance improvements
- Worked with structured business and user-related data

EDUCATION

Pace University — New York, NY
Master of Science in Computer Science
Graduated: December 2025
GPA: 3.59 | Merit Scholarship

University of Greenwich — London, UK
Bachelor of Science in Computing
Graduated: January 2023
GPA: 3.42 (Honors)

RELEVANT COURSEWORK

- Computer Systems and Concepts
- Parallel Computing
- Internet Computing
- Database Management Systems
- Software Engineering
